Transcranial Magnetic Stimulation (TMS)

Safe and Effective for Adolescent Depression!

Many people dealing with depression have given antidepressants a try without success. Some seek the right treatment that feels good for them or a loved one. No matter the situation, there are other ways to find relief besides medication.

Nearly 10,000 adolescents have been treated with over 300,000 NeuroStar sessions. (Based on 169,000 global patients treated. Data on File, 2024)
